Notice of the hybrid NTCSA Transmission Development Plan Public Forum

The transmission license issued by NERSA to the National Transmission Company South Africa (NTCSA), a subsidiary of Eskom Holdings SOC Ltd, requires the annual publication of a Transmission Development Plan (TDP), which details the proposed strengthening and development of the transmission network in South Africa over the next 10 years. Eskom will be hosting a hybrid public forum to present the TDP 2025 - 2034.

The consultative process is intended to provide an opportunity for stakeholders to influence the long-term development of the transmission system. Stakeholder participation is critical to ensure that the NTCSA considers the views of the public, industry, business sectors, local government, and other infrastructural development partners. The aim is to have a Transmission Development Plan that supports the development of the country and its people.

The hybrid NTCSA TDP Public Forum is scheduled to take place as follows:

Date: Wednesday, 30 October 2024

Time: 09:00 - 15:30

Venue: John Maree Auditorium, Eskom Academy of Learning
Dale Road, Midrand
GPS Coordinates: S 25' 59.32' E 28' 10.14'

RSVP: Interested parties are requested to register by Monday, 28 October 2024
by sending an email to: tinkie.ndzamela@ntcsa.co.za
